14) SEO KEYWORD DIRECTION FOR THIS HOMEPAGE COPY

I am not stuffing these into the homepage unnaturally, but the copy is now aligned around these types of keywords:

Short-tail:

- healthy snacks
- millet snacks
- healthy snack combo
- puffed rice snacks
- grain snacks
- gluten-free snacks

Long-tail:

- healthy snacks made with millets
- no palm oil snacks in India
- healthy snack combo boxes online
- flavoured puffed rice combo pack
- better snacks for office hunger
- light evening snacks online India
- supergrain snacks for everyday munching
- healthy Indian snacks with real ingredients

15) FINAL MICROCOPY SUGGESTIONS FOR PRODUCT CARDS

These can be used under product names or as mini badges across the site.

Good options:

- Light & Crunchy
- Better Everyday Snacking
- Family Favourite
- Bestseller Combo
- Great First Buy
- Made with Real Ingredients
- Value Pack
- Try More Flavours
- Easy Tea-Time Pick
- Office Snack Favourite

16) IMPORTANT CONTENT RULES TO FOLLOW ACROSS THE HOMEPAGE

These rules should be followed by whoever uploads the text:

Do:

- say **no palm oil**
- say **gluten-free**
- say **zero cholesterol**
- say **made with real ingredients**
- say **light**
- say **bold flavours**
- say **supergrain**
- say **better snacking**
- say **puffed rice packets inside** when referring to free packets

Do not:

- do not use **roasted** for chips
- do not overuse health claims in every line
- do not make it sound medicinal
- do not make it sound too gym-only
- do not make every product sound identical

17) FINAL Figma / UX SUGGESTIONS WITHOUT CHANGING THE LAYOUT

I am keeping your hierarchy and Figma intact, but these are strong improvements worth applying inside the same structure:

1. Product tabs should not just say generic category words

Use:

- Bestsellers
- Jar Combos
- Puffed Rice Combos
- Shop All Jars

This is a meaningful upgrade.

2. Essential Box should become the real homepage hero offer

Use the name:**The Supergrain Starter Box**and clearly show:**Includes 3 puffed rice packets inside**

This will improve conversion.

3. Add Blinkit logo in the availability strip

Show:Amazon | Blinkit | MyStore

4. Add 4 icon claims somewhere visible near the benefits or starter box

Best final 4:

- No Palm Oil
- Gluten-Free
- Zero Cholesterol
- Made with Real Ingredients

5. Avoid repeating Ragi too heavily in visible homepage cards

That's why I diversified the tabs and combo suggestions above.

18) FINAL READY-TO-USE SHORT VERSION OF EACH MAIN HEADING

This is for quick developer reference.

- **Hero 1:** Power of Real Grains for Better Snacking
- **Product Section:** Explore the Grainzz Snack Range
- **Benefits Section:** Healthy Snacking With Benefits That Truly Matter
- **Discount Combos:** Best Value Combos to Start With
- **Feature Box:** The Supergrain Starter Box
- **Testimonials:** What People Are Saying About Grainzz
- **Instagram:** See How India is Snacking Better with Grainzz
- **FAQ:** Frequently Asked Questions

This version is much stronger now.

It is cleaner, more premium, more SEO-aware, more correct for Grainzz, and more conversion-focused.

The next best step is for me to turn this into a **clean Word document format section by section**, with:

- section name
- exact heading
- exact body copy
- exact CTA
- developer notes
- product mapping
- tab mapping

so your coder can directly implement it without confusion.
